

PRODUCT NEWS AT JEM**Spring 2007****Smart Cabinet II**For more information on SMC products email us at support@jemcomputer.com

Smart Cabinet II is the latest technology in Data Center Managed Access. Smart Cabinet II provides a real time network wide knowledge based Remote Data Cabinet Access system. The NEW Smart Cabinet II provides keyless access control connected directly to a proactive management solution. When security and management for your data and equipment is paramount, SmartCabinet II® provides the solution. A safety entry system controls access to the cabinet while SMC Smart Software provides monitoring, auditing, notification and reporting capability to track activity at your data source.

Smart Cabinet II will show you:

- * WHO opened a server cabinet door
- * WHAT server cabinet door did they open
- * WHEN did they open and close the server cabinet door
- * WHERE is the server cabinet located
- * WHY was the cabinet door opened

Custom configurations and Drawings available.

CommandCenter NOCFor more information on Raritan products email us at support@jemcomputer.com

The CommandCenter NOC family of management appliances helps businesses address a wide range of IT problems before they occur

The CommandCenter NOC family of management appliances helps businesses address a wide range of IT problems before they occur. It keeps your IT infrastructure under constant scrutiny to guard against network outages, degradation, performance slowdowns, security weaknesses and incoming attacks.

CommandCenter NOC provides the following world-class network and systems management capabilities:

- * Traffic analysis, vulnerability scanning, intrusion detection, asset management, notification and reporting all in an easy-to-deploy appliance.
- * Helps ensure application availability and network resource optimization along with the ability for a 3rd party like a consultant or MSP to monitor your environment.
- * Helps implement your IT compliance strategy and tactics via notifications, integrated management dashboards and reports, to give decision makers actionable intelligence.
